

QUALITY POLICY

Ecorub is established to develop circular economy materials and products out of recycled rubber and recycled plastic into new, cost effective TPRR materials. We are committed to provide excellent solutions to clients engaged in rubber and plastics while ensuring environmental safety and sustainability. In order to achieve this objective, our quality policy is to:

- Understand customer needs and design safe and environmentally friendly products.
- Manufacture cost effective durable products with consistent quality.
- Strictly comply to applicable standards and regulations for all our activities
- Optimise cost through maximising productivity.
- Develop key performance indicators.
- Continually developing the expertise and integrity of our employees

We are committed to involve every person taking pride in their personal contribution towards waste management and sustainable development.
